EDUCATION

Maulana Abul Kalam Azad University of Technology, Haringhata, India   *Oct 2021 – Jul 2025*
Bachelor of Technology in Information Technology   **CGPA:** 8.9/10

SKILLS

Programming Languages: C++, JavaScript

Technologies/Frameworks: React.js, Redux, Next.js, Node.js, Express.js,Tailwind CSS, OOPs (Object-Oriented Programming), REST APIs

Web Development: HTML, CSS, JavaScript

Databases: MySQL, MongoDB

Tools/Editors: Visual Studio Code, GitHub

INTERNSHIPS

Digisamaksh Groups   *Jul 2024 – Sep 2024*
Web Development Intern
- Worked daily on assignments and participated in team meetings.

Theody Svadhyay Trailblazer, Bangalore, India   *Oct 2024 – Dec 2024*
Full Stack Developer Intern
- Collaborated with the team to develop and optimize web applications.
- Improved user interface designs for seamless user experience.
- Developed and maintained frontend and backend components using modern web technologies.

PROJECTS

Online Food Application   GitHub   *Jun 2024*
Tech Stack: React.js, Tailwind CSS, Redux Toolkit, Node.js, Express.js, MongoDB, Razorpay
- Built a full-stack food ordering application with features like restaurant selection, cart management, and secure Razorpay payment integration.
- Implemented JWT-based authentication and role-based access control for user, admin, and manager roles.
- Developed multiple routes for seamless navigation, enabling features like cart management and checkout.
- Integrated location-based suggestions for nearby restaurants.
- Created RESTful APIs for CRUD operations.
- Utilized Redux Toolkit for state management and MongoDB for scalable storage.
- Secured user data using bcrypt hashing for password encryption.
- Designed a feature-rich cart for streamlined payment flow.

Multi-lingual Document Summarisation Using Machine Translation   GitHub   *Sep 2024 – Present*
- Developed a web application for summarising and translating documents using NLP techniques.
- Implemented React.js and Tailwind CSS for the frontend; Node.js, Express.js, and MongoDB for the backend.
- Demonstrated expertise in full-stack development and machine translation.
- Incorporated advanced Python NLP pipelines (Transformers) and Flask for model integration.
- Enabled secure authentication using JWT and bcrypt for password hashing.

Cryptocurrency Tracker Application   GitHub   *Nov 2023*
Tech Stack: Next.js, Tailwind CSS, Node.js, Express.js, MongoDB
- Developed a live cryptocurrency tracking application to display coin details in a tabular format.
- Integrated a live API to fetch real-time data for cryptocurrencies and their values in INR.
- Designed the frontend using Next.js and Tailwind CSS for responsive and dynamic UI.
- Built a secure backend with Node.js and Express.js, ensuring data accuracy and seamless updates.
- Utilized MongoDB for database management with proper authentication implemented via JWT tokens and bcrypt for hashed passwords.
